

Flatten the learning curve

The Start button

In the lower-left corner, it puts what you need at your fingertips.

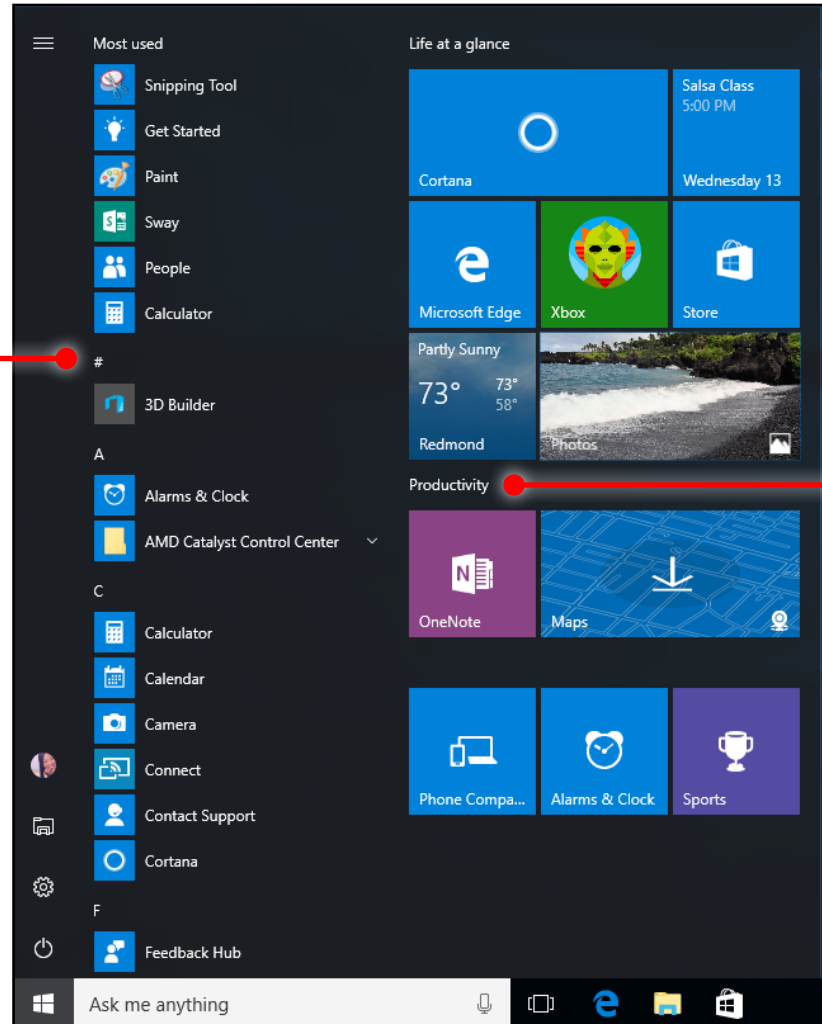

Browse every app

Find files

Personalize settings

Make the defaults even better. Monitors, networks, printers, and more.

Turn the PC off

Use an app all the time? Pin it

Press and hold (or right-click) an app, then select **Pin to Start**.

Group apps

Drag apps into groups, press and hold (or right-click) to resize, and select the title space to give the group a new or better name.

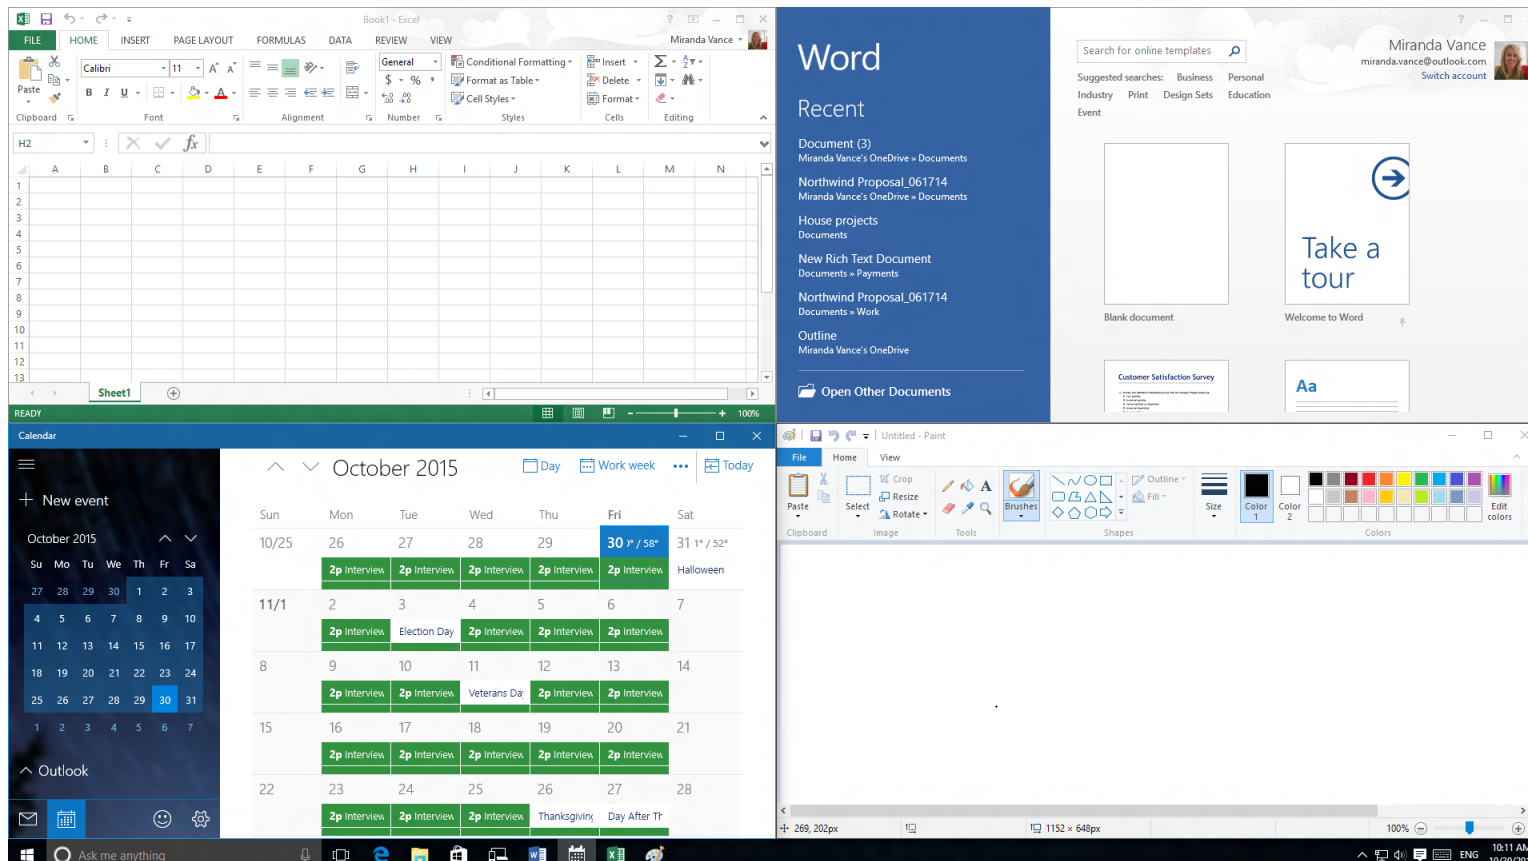

Quick Start: Desktop at work

See more of your work at once

Grab the top of a window and drag to a corner or side

Do it again with another app. Snap as many as four at one time.

Tap or click Task view  button to switch apps
